A. E. MICHAEL

A GOOD PLACE TO TRADE.

U. F. Local Meets.

A meeting which was largely attended was held on Saturday last of Stony Plain U. F. A. Local, at the Royal Hotel. Mr August Kreye was in the chair, and Mr Lawrence Zilliox acted as secretary.

The meeting had been called for the purpose of considering matters in connection with the proposed changes in the Liquor Act insofar as it applies to the sale of beer in licensed beer salerooms.

After some discussion by a number of those present, a resolution was put and carried calling on the Government to surround the Act to allow the sale of beer in bottles at hotels, for consumption of the licensed premises. The resolution was moved by P. W. Trantman and seconded by Henry Kulak.

As pointed out by several of the speakers, farmers residing a considerable distance from the breweries, at present are practically barred from having beer in their homes, not being allowed the privilege of purchasing except by the glass, in the beer salerooms.

The motion carried unanimously, and a delegation appointed to bring the matter to the attention of the member for this riding.

Farmers to Stay with It

The scarcity of auction sales this winter seems to indicate there will be few farmers leaving their farms, in this district at least, the coming season. The number of inquiries for farms to rent or for sale near Stony Plain seems to show a back-to-land movement. One farm advertised for rent in the Sun's columns brought quite a number seekers, giving the lessee a wide choice from which to pick his renter.

Women's Institute

On Thursday March 12th the Women's Institute met at the home of Mrs A E Michael. Following the business part of the program, Mrs James Smith gave us in her splendid paper, a vivid picture of life in the Northwest. We had an opportunity, too, to see several specimens of the wonderful work of the natives and also some very good pictures, which completed the entertainment of the afternoon. After a hearty vote of thanks, refreshments were served by Mrs Michael, assisted by Mrs Walton.

The meeting adjourned with the singing of the National Anthem.

Inga Councillors.

Inga Councillors met last week at the home of Reeve Howat, Carvel, with all the members present. Councillor Goerz received congratulations on his re-election to the board, and made a suitable reply.

Reeve Howat having declined to run again for the office, Councillor E Tattersall of division 3 was unanimously elected as the presiding officer for the ensuing term.

Secretary Pidgeon had his salary raised by \$200, making it \$1200 per annum.

The Highland Brigade from division 2 was present in full force, and considerable time was taken up discussing the road problem in that division. Finally the matter was laid over till next meeting.

With only one dissenting voice, a motion carried that the Councillors meet at the same place on Friday April the 3rd.

LOCAL NEWS.

Miss E Wolfe, Edmonton, spent the week-end with her parents, Mr and Mrs A Wolfe, Glory Hills.

Dr and Mrs Oatway had as a guest this week Mr Gillirie of Olds.

Mr and Mrs J W McCulla were visiting friends in the City on Saturday.

Rev Prof. Schwerman of Edmonton preached in St. Matthew's Church on Sunday last.

Mrs Leonard M Larson returned Monday night from an extended visit with friends at Melville, Sask.

Mr C F Founds is undergoing treatment this week in the University hospital, for an old wound.

Mr and Mrs R A Gosset and family returned to Stony on Saturday, from a two-months' visit at Vancouver and Victoria.

Mr Clas Schultz installed last week a Delaval milking machine at his dairy farm, and it is giving entire satisfaction.

Mr Philip Litzenberger on Saturday shipped a 1300-bu. car of wheat to the Wheat Pool.

As high as 12c a pound was paid for hogs last week by the local buyers, and about four cent's were obtained, two going west to Vancouver.

Wheat has dropped 45c in 14 days, and oats 17c in the same time.

Meredith Bros. shipped a car of stock to the stockyards yesterday.

A very charming house party was given Friday evening the 13th at the home of Mr Hubble, west of town, when a large party of neighbors and friends turned out and enjoyed themselves by dancing.

Mr and Mrs Rudolf Goerz entertained a number of their friends at their home in the east end of town, on Sunday evening last. A large party of guests were present, and the evening was pleasantly spent with dancing and games.

Miss E Wolfe entertained a number of young people at the home of her parents, Mr and Mrs Wolfe, Glory Hills, on Friday evening, March 13. A delightful evening was spent in dancing and trying contests. Those present were—Mr and Mrs A Wolfe, the Misses F Cain, Mabelle Clarke, Florence Graden, L Lavery, Alice McKinlay and Ray Wolfe of Edmonton; and Messrs H B Latind, N MacPhee, H Schellenberger, John Schlitt, George Wolfe and H H Wolfe.

A meeting of the Arts and Crafts Club of the W. I. will be held at the home of Mrs J Malloch on Thursday evening March 19 at 8.30 p.m. when Mrs Robertson will give a demonstration of Punch Work embroidery. During the evening several musical items will be rendered. A hearty invitation is extended to all who are interested.

Canada Must Fight Geography

Sir John A. Macdonald, the first Premier of the Dominion, used to say that Canada was a difficult country to govern. The truth of that observation has become more and more apparent with the passing of the years. In Sir John's day the greatest difficulty was found in reconciling the opposing viewpoints of the French and English speaking, Protestant and Roman Catholic elements of our population, although he also was confronted with the differences existing in the economic requirements of Ontario and Quebec as compared with the Maritime Provinces. The West versus East problem had not become acute prior to Sir John's passing.

Much of the bitterness in regard to racial and religious differences which divided Canada into two camps in the eighties and nineties has passed away. Occasionally the dying embers are fanned by extreme partisans bankrupt of any solid basis for opposition to their political opponents, but such tactics are frowned upon by the people of Canada generally.

But while education and the cultivation of a spirit of charitableness has largely succeeded in banishing the old partisanship and bigotry of the past, lines of division among the people of Canada are just as sharply drawn as ever, only now the differences are wholly economic, whereas formerly they were racial and religious. While it is regrettable that there should be lines of division, they are much to be preferred to those which once existed and bedevilled public life and largely nullified every effort toward national development of the Dominion.

In this very strenuous commercial age, and in a world still handicapped by the upheaval of the Great War, Canada finds itself unable to present a united front to the world with a strong and well defined national policy. On the contrary, there is a lack of anything worthy to be called a national policy. There is an absence of deep national sentiment. Instead of the people being united as Canadians first, last and all the time, they are divided into three main groups—the far east or Maritime Province group, the central or industrial group of Ontario and Quebec, and the Western agricultural group. To some extent there is a fourth, or far west group, British Columbia. Events are, however, rapidly shaping themselves making the interests of the Prairie Provinces and British Columbia common interests.

Not man, but nature itself, has set up the obstacles operating to divide Canada into these distinct groups. For half a century Canada has been fighting nature, or geography, in an almost superhuman and certainly courageous effort to build up a united people and nation on the northern half of this continent. Canadian public men, irrespective of party, or race, or religion, and regardless of the fiscal or economic views held by them, have striven to achieve this result. It has been their lifelong dream, and the ardent desire of the majority of native-born Canadians.

Canadians have poured out money like water to develop the Dominion east and west and bind it together and into one unit from the Atlantic to the Pacific. Yet the desired result has not yet been achieved. Why? Because with a mere handful of people Canada has to fight geography all along the line. Nature never intended that the entire traffic and business of this country should proceed along rigid east and west lines. There is, first, the gap between the Maritime Provinces and the centres of Quebec and Ontario, it being easier and cheaper for the central provinces to do business to the south, for trade, like the flowing water in a river, follows the lines of least resistance. Then comes the 1,900-mile barren stretch between North Bay and Winnipeg. Finally, the Rocky Mountains erect themselves between the Prairies and the Pacific Coast.

In Canada it is a continuous fight against geography to build up a nation along east and west lines. Yet if Canada is to remain a distinct national unit, that fight must be persisted in. There is no other alternative. Either the Dominion must break up into three or four separate groups, or become merged into the republic to the south, or its people must get together, compromise their more acute differences, adopt a policy of give and take, and with renewed courage and energy continue the battle with the obstacles which nature has set in our path to a strong, united nationhood.

It is worse than foolish; it is positively suicidal whether as individuals, geographical groups, or as a Dominion, to go on as the Canadian people have been going. A house divided against itself cannot stand, and Canadians must either get together before long and unite on some common policy which, while not meeting the extreme views of any one section, will be acceptable to and command the support of all, or the Dominion will break up or be swallowed up.

Furthermore, the get-together policy must, in the present temper of the people, be adopted before long or it will be overhauling too late. It may not be exactly popular to say these things quite so bluntly, but they are true, and the facts might just as well be faced. It is, therefore, the imperative duty of all true citizens and lovers of the Dominion to bend their minds and energies to the task before them and save this Dominion for their children and children's children.

No Secession Talk

Robert Forke Says There is No More Patriotic Section in Canada Than in the West

Emphatic denial is reported that Western Canada largely favored "secession" was made by Robt. Forke, M.P., leader of the Progressive party, in presenting the western viewpoint on the tariff and other matters of national importance before the Young Men's Club of the board of trade at Toronto.

In declaring that Canadians were going to fight out their own problems as one family, Mr. Forke said: "I can assure you that there is no more patriotic section of this country than the West and that this talk of secession has been unwarrantably magnified."

"I have no fault to find with moderate protection of Canadian manufacturers, but I would like to see the government announce a definite policy regarding protection and stand by it, rather than have the tariff subject to constant alterations."

It would be very difficult, said Mr. Forke, to convince the western farmer, who sold his produce and cattle in the open markets of the world, that he stood to gain by protection.

Subdues Sore Throat In a Short Time

When a severe cold grips your throat, when it makes you gag and cough—that's the time you ought to apply good old "Nerviline." This wonderful remedy works right in, penetrates to the very core of the affected region. You get a truly wonderful effect from Nerviline, and for sore throat, tight chests and bad colds nothing else will act the same as Nerviline. Try it. It's ten times stronger than other liniments, full of pain-subduing power, Nerviline is a necessity in every home. Get a 5c bottle to-day.

Saskatchewan Horses For B.C.
A carload of heavy draft horses was purchased in Saskatchewan recently for prices ranging from \$200 to \$300 per head. Nine hundred dollars was paid to one man for three grade horses, and seven head cost \$1,560, an average of nearly \$230 per head. These horses went to the B.C. lumber woods.

Message of Hope to the Old Folk

**George Crawford Tells What
Dodd's Kidney Pills and Dodd's
Dyspepsia Tablets Did for
Him**

Quebec man relieved of rheumatism and stomach trouble.
STANDON, Que.—(Special).—Another tribute to Dodd's Kidney Pills is sent to us by Mr. G. Crawford, a well known resident of this place. He says: "It is with pleasure that I let you know your Dodd's Kidney Pills have done me good and I am well satisfied with the results. My trouble started from a cold. My sleep was broken and unrefreshing and I had a bitter taste in my mouth, especially in the mornings. Rheumatism also troubled me. I am now taking your Dodd's Dyspepsia Tablets and find them very good. When I feel my stomach bad I take them and get instant relief. My age is 76."

Dodd's Kidney Pills not only relieve the pain or ache that is causing the most distress, but they put the kidneys in good working order and all the impurities and poisons are strained out of the body.

Dodd's Dyspepsia Tablets keep the stomach free from trouble. They are a natural remedy, digesting the food while the stomach rests and recuperates.

London Fogs Take Heavy Toll

Deaths From Lung Disease, Reach Height During Winter

According to one authority, says Popular Mechanics, a single London fog may cost more lives than a pitched battle. The period of the greatest prevalence of the dense mists is in December, with the other winter months not far behind. At this season of the year the death rate from lung diseases reaches its height. The heavy, moisture-laden air aggravates such maladies, the lack of sunlight reduces physical resistance and illness frequently results from chills caused by the dampness. Mental depression is considered another harmful effect.

Many persons have a raw biting power of 200 pounds.

English Firm Gets Contract

Carillon and Clock For Ottawa Will Cost \$63,930

The contract price for the carillon and clock to be installed in the new Victoria Tower on Parliament Hill is \$63,930, according to official announcement made by the department of public work, Ottawa. An order-in-council has been passed awarding the contract to Messrs. Gillett and Johnston, bell founders, of Croydon, England. The carillon will consist of 53 bells. The contract calls for complete installation by March 31, 1926.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Ecclidge's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it to-day and know for yourself.

Freezing By Wireless

A Scandinavian claims to have designed a contrivance that will broadcast refrigeration (according to the inventor) in exactly the same way as present-day wireless stations broadcast music. All that the housewife of the future will have to do is to keep her refrigeration receiver tuned to a central sending station.

Sores Fie Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similar troubles should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Making Banana Flour

The manufacture of banana flour has been started at Singapore, India. It will be used in the manufacture of chocolate biscuits, cakes, and as a beverage mixed with cocoa and milk.

Minard's Liniment Fins for the Hair

New Zealand Blind Are Prosperous
Out of 600 blind people in New Zealand, only 87 have applied for the pension granted by parliament. The explanation is that they are able to make a good living in various ways.

Return Relic To Canada

The shield which was taken from the gates of old Quebec after the capture of the city by General Wolfe, and is now in possession of the town of Hastings, Eng., will be returned to the Canadian city.

NATURE'S WARNINGS

**Danger Signals That Everyone
Should Take Seriously**

Pain is one of Nature's warnings that something is wrong with the body. Indigestion, for instance, is characterized by pains in the stomach, and often about the head; rheumatism by sharp pains in the limbs and joints; headaches are a sign that the nerves or stomach are out of order. In some ailments such as anaemia, pain is not so prominent. In this case Nature's warning take the form of pallor, breathlessness after slight exertion, palpitation of the heart, and loss of appetite. Whatever form these warnings take, wise people will not ignore the fact that many diseases have their origin in poor blood, and that when the blood is enriched the troubles disappear. Dr. Williams' Pink Pills are most helpful in such cases because they purify and build up the blood to its normal strength. In this way it tones up the nerves, restores the appetite and gives perfect health. Miss Hazel Bernat, of Annapolis, Ont., has proved the great value of this medicine and says:—"I am a young girl and have been working in a factory for the past four years. For two years I had been in such poor health that at times I could not work. I was thin and pale, and troubled with headaches and fainting spells. I doctored nearly all this time, but it did not help me. My mother advised me to take Dr. Williams' Pink Pills, and after using them for a while I noticed an improvement in my condition. I used nine boxes and can truthfully say that my health is restored. When I began taking the pills I weighed 97 pounds and now I weigh 114. I feel that I owe my good health to Dr. Williams' Pink Pills and hope other ailing people will give them a fair trial."

You can get these pills through any medical dealer or at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

India's First Electric Railway

The first electric railway in India was opened by Sir Leslie Wilson, the Governor of Bombay, when he set in motion a train on a Bombay suburban section of the Great Indian Peninsula Railway.

Children Cry for

**Fletcher's
CASTORIA**

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*.
Proves directions on each package. Physicians everywhere recommend it.

Five Bushels Per Acre More In Production Is Possible Within the Next Ten Years

F. S. Archibald, director of experimental farms in Canada, told the members of the University Club at Ottawa recently, that a five-bushel per acre increase in production of wheat in Canada is possible within the next ten years. This would add to the value of Canada's yearly production between 120 and 200 million dollars. It is quite within the realm of possibilities, he said, that within the next 10 to fifteen years, science may increase the value of Canada's agricultural products by from 250 to 300 million dollars a year.

Mr. Archibald also explained that it was possible the output of milk by a single cow could be increased by 1,000 pounds a year. This would mean an added revenue to Canada of fully 60 million dollars a year.

The address was an earnest plea for sympathetic consideration on the part of city men for the problems of the farmer and for the work that is being done in the way of experimentation on scientific lines.

Mr. Archibald said that agriculture is still Canada's seven billion dollar industry, which employs and maintains a little over one-half the population of the Dominion. Indirectly, also, it is responsible for industries and employment of well over 50 per cent. of the remainder of the people. Agriculture yields 24 times the production of the mines, fisheries and forests of Canada, said the speaker.

Beef and Butter For Orient

Demand For Canadian Products Shows Rapid Increase
Increased demand in the Far East for Canadian beef and butter was evidenced in the heavy consignment of refrigerated cargo which left Vancouver recently for Oriental ports on the Canadian S.S. Empress, at Manila. More than \$25 ton of these commodities was shown on the ship's manifest. The big liner took out more than 300 passengers, including a party of eight Shell Oil representatives en route to the Far East. To open new branches of that company in China and the Dutch East Indies.

Alberta Sugar Plant

Construction to Commence at Once on Millen Factory
It has been officially announced that the Utah-Idaho Sugar Company will commence construction at once on a million dollar sugar plant at Raymond and will be ready to open beets by next October. Six thousand acres of beets, with a production of between 70,000 to 80,000 tons, have been signed up by irrigation farmers on Southern Alberta projects. Two more factories will be erected in Southern Alberta if the Raymond plant proves the success expected.

Titled Ranchers

Descendant of Louis Philippe of France May Locate in Alberta
Southern Alberta is to have another addition to its growing list of titled ranchers, according to report. The Duc de Nemours, a descendant of Louis Philippe of France, it is stated, is sailing in April to visit Lord and Lady Rodenay, who have a ranch at Fort Saskatchewan, Alta. It is also stated that the duke expects to acquire a ranch near that of the Prince of Wales in the southern area of the province.

S.C. Pine Seed For Finland

Among the recent shipments of lodge pole pine seed from the Dominion Government's seed extracting plant at New Westminster, B.C., was one consigned to Finland, where it is intended will be made to propagate this species of forest tree. Other large shipments have been made during the past two or three years mainly to the British Government forestry commission in London.

There is nothing wrong with the mind of a man who minds his own business.

A man's success often depends on his ability to prevent others from prevailing.

Experimental Stations For Bay Territory

Suggested at Ottawa That Seed be Sent to Port Nelson

The establishment of experimental stations at points on the Hudson's Bay Railway has been urged at Ottawa. Western members expressed the opinion that the district traversed by the 200 miles of Hudson's Bay Railway now in operation had great agricultural possibilities.

R. A. Hoey, Progressive, Springfield, suggested to Hon. W. R. Motherwell, minister of agriculture, that seed for experimental purposes should be sent to Port Nelson, the terminus of the Hudson's Bay Railway. The production of samples of grain and vegetable grown in that district would act as an aid to immigration.

Mr. Motherwell informed the house that he had been considering the establishment of a sub-station on the Hudson's Bay line. He said Mr. Hoey's suggestion was an excellent one and he would be glad to accept it.

To Help Mining Industry

Its Tremendous Importance to the Dominion Is Recognized

Eloquent assurance of wholehearted support from the government was given to mining men of the Dominion in general and of Ontario in particular, by Hon. Charles Stewart, minister of mines for Canada, and by Hon. Charles McCrear, minister of culture for the province of Ontario, in addresses given by them at the banquet which terminated the 27th annual general meeting of the Canadian Institute of Mining and Metallurgy at Ottawa.

Hon. Charles Stewart assured the members that he ever kept in front of him the duty of calling the attention of those around him to the importance to the Dominion of the mining industry, and its tremendous possibilities in the future.

Making Sugar From Artichokes

Process So Simple It Would Reduce Cost of Product

By a process discovered by experts of the government bureau of standards, sugar one and a half times as sweet as the cane and beet varieties can be extracted from artichokes. The refining treatment necessary is so simple that, it is said, the cost of manufacturing the product can be greatly reduced. Because of the low expense in cultivating the vegetable and its heavy yield when compared to other sugar-bearing plants, it is believed artichokes may be extensively employed to provide a great part of the future crops. Lack of means of crystallizing the extract has been a bar heretofore.

Canadian Exports to Germany

Nearly 100 Per Cent. Increase in Past Three Years

There has been a steady expansion in Canadian exports to Germany since the war according to a bulletin issued by the department of trade and commerce, and during the last three years the rate of increase has been nearly 100 per cent. a year. The imports from Canada for the twelve months ending October, 1924, totalled \$25,159,966, as against \$12,838,443 and \$6,096,097 in the corresponding periods of 1923 and 1922 respectively.

Good Prices For Farm Land

Seventy dollars an acre, the peak price in several years, was paid by a Belgian for a quarter section of improved land near Edmonton. Belgians are buying considerable farm property in this district. A syndicate from that country has purchased Kenneth McLeod's 300-acre farm, six miles west of Edmonton, for \$20,000.

Silver Black Foxes in Alberta

More than 1,500 silver black foxes are domiciled on farms in the Calgary area and rabbits from Southern Alberta, where they are unusually plentiful this year, are being brought in by the carload to feed them.

About 90 per cent of muskoxen conservation is of no earthly use.

The Many Different Basic Sources of Wealth Which Are To Be Found in Canada

Seized Good Opportunity

Farms Being Prepared For Dairy Community Near Winnipeg

Within 50 miles of Winnipeg a vast dairy community is soon to spring into being. "Thirling" is used deliberately, for within two months ready-made farms will be ready for 25 families, and these will be the first of 250 or 400 such homes. The whole project, financed from St. Paul, will include 70,000 acres and will take about \$2,000,000. Each settler will have 160 acres, with 20 broken, a home, a barn, and ten cows. The settlers will be from the United States and Europe and will be "handpicked."

That is opportunity—a dairy community within 50 miles of one of Canada's most progressive cities. Perhaps it did not seem possible. Yet now, it is started, the only wonder is that no one thought of it before. The country is full of such opportunities—border cities star.

Motive Easy To Understand

Canada Has Reason For Wanting Embargo on Pulpwood

The motive behind the movement for an embargo on Canadian pulpwood is plain. It is, in the main, to provide that the employment and wages incident to the converting of pulpwood into paper shall go into the pockets of our own workmen, not into the pockets of workmen in the States. It is to prevent the existing condition whereby every carload of pulpwood that crosses the border takes work and wages from labor in Canada and gives them to labor in the States. It is in a word to foster the sound policy of developing the resources, the industries of Canada, instead of sacrificing them to the advantage of others. If there is a nation in the world that ought to be able to understand that motive, that nation is the United States.—Ottawa Journal.

Metal Products in Canada

Over 106 Million Dollars Invested in Plant and Equipment

Representing an actual investment of more than 106 million dollars in plant and equipment, 233 establishments in Canada manufacturing products from metals other than iron and steel in 1923, produced commodities having a total selling value in excess of \$8 million dollars and a value added by manufacturing of more than 45 million dollars, according to a report issued by the Dominion bureau of statistics. The manufacture of electrical apparatus and supplies was the chief industry, having a value of more than \$1 million dollars.

Western Flour Goes to Russia

Alberta flour mills will receive direct benefit, it is expected, from the large order placed by the Russian Government with Canadian mills for more than \$12,000,000 worth of flour. The order is to be filled by the Maple Leaf Milling Company, which has a mill at Medicine Hat, and by the Western Canada Flour Mills Company, which has mills at Calgary and Edmonton.

It is one of the outstanding features of Canada that she has naturally as many different sources of commercial strength as any one country can have, and has also the very decided advantage of being able to bring into commercial play a great variety of these sources of wealth, save the natural resources intelligence service of the department of the interior. First, it has a remarkable estate in lands suitable for grain growing, stock raising, fruit farming and other forms of husbandry. It has immense forest areas of pulpwood species as well as saw timber. The range of its mineral products is altogether unusual. Its waterpowers are generous in extent, and well distributed. A great area of fertile fresh and salt water fishing grounds, and an abundance of useful wild life, round out the physical estate. Thus nature itself has given to Canadian enterprise about all that any country needs in order to attain commercial strength as well as else.

The net primary production figures for 1923 for each of these broad divisions give some very interesting results. In the Maritime group, for instance, in round figures, the following is as follows: Agriculture, \$88,522,000; forestry, \$25,336,000; fisheries, \$18,504,000; trapping, \$260,000; mining, \$24,180,000; electric power, \$3,821,000. It will be noted that the Maritime Provinces, as a group, have been able to draw each of several different classes of physical resources into commercial play on a considerable scale. Agriculture alone accounts for the other primary industries, but forestry, fisheries, mining and fishing have likewise assumed large proportions. The Maritime area, as a whole, exhibits an unusual degree of both natural and developed diversity.

The basic industries of Ontario and Quebec are, of course, on a larger scale. In this group agriculture overshadowed the other primary industries more heavily than in the case in the Maritime area. Nevertheless, Ontario and Ontario possess great strength in lumbering and mining, and, although fishing is a minor factor, this group presents a new giant in its power-generating industry. Taken together, the greater predominance of agriculture, the Ontario-Quebec division is obviously one of exceptional variety in basic pursuits. The value of the individual industries is as follows: Agriculture, \$258,973,000; forestry, \$19,140,000; fisheries, \$4,947,000; trapping, \$2,226,000; mining, \$7,847,000; electric power, \$61,914,000.

No other form of primary industry approaches agriculture in importance in the prairie provinces. Aside from the prairie, mining has made the most notable advance. The figures are: Agriculture, \$487,759,000; forestry, \$2,506,000; fisheries, \$1,484,000; trapping, \$4,731,000; mining, \$3,355,000; electric power, \$9,993,000. Leadership in British Columbia and the Yukon belongs to forest industries. Mining also improves its relative position, and fishing is likewise prominent. Here alone agriculture yields rank. In fact, British Columbia draws its commercial significance more equally from the several different branches of primary industry than does any other province. No one main industry is overwhelmingly dominant, as will be seen by the following value: Agriculture, \$36,018,000; forestry, \$52,045,000; fisheries, \$13,849,000; trapping, \$1,564,000; mining, \$39,135,000; electric power, \$7,667,000.

The individual figures for the Yukon are: Fisheries, \$10,000; trapping, \$5,035,000; mining, \$1,785,000; electric power, \$118,000.

Vancouver Grain Port

Additional storage facilities to care for 2,000,000 bushels of grain are being provided at No. 1 elevator at Vancouver this year, according to a statement made here by E. E. Beattie, harbor commissioner. At the beginning of the shipping season, Vancouver will have accommodation for 7,000,000 bushels of grain, he said.

A good wife leads a man heaven ward, but a bad one drives him else where.

The success of a charity bazaar depends on how much has been taken in and how many.

Soup or Lava?

This does not portray a modern cafeteria after a fire. The gentleman, one of the passengers on the "Empress of France," now touring the world, is peering into food containers in a Pompeian shop. After all, the Romans did stop to eat while they were building colosseums, roads and basilicas, and it is suggested that the gladiator could polish off a "hot dog" or two after dispatching the old lion of Christiana.

A Romance of the Spanish Main CAPTAIN BLOOD RAFAEL SABATINI

Copyright, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, is sent to the Barbadoes as a slave under orders of King James. He is bought by Colonel Blimp, the military commander, and falls in love with Arabella, the niece of the colonel. Spanish buccanniers bombard the city and sack it. Blood saves Arabella and Mary Trull. He captures the ship and sails for Tortuga, the rendezvous of buccanniers of the Spanish Main. There Captain Blood, tormented by his fear that he will never see Arabella again, and importuned by his comrades, takes command of a pirate fleet. Levasseur, a Frenchman, enlists under him. Levasseur captures a Dutch vessel and lands with Madelon d'Ogeron and holds Madelon as hostage. Upon this scene enters Captain Blood whose ship had lost sight of Levasseur's vessel in the storm.

CHAPTER XVI—Continued

"Not so," Levasseur continued himself with difficulty before that brood. "They were in the Dutch brig."

"I don't remember that you mentioned them before."

"I did not. They are prisoners of my own—a personal matter. They are French."

"French!" Captain Blood's light eyes stabbed at Levasseur, then at the prisoners. He frowned thoughtfully upon Levasseur.

"Yesterday you surprised me by making war upon the friendly Dutch. But now it seems that not even your own countrymen are safe from you."

"Have I not said this is a matter personal to me?"

"Ah! and their names?"

"The prisoner answered for him."

"I am Henri d'Ogeron, and this is my sister."

"D'Ogeron?" Captain Blood stared.

"Are you related by chance to my good friend the Governor of Tortuga?"

"He is my father."

"The ansals preserve us now! Are you quite mad, Levasseur?"

Captain Blood sat down on the cask that Levasseur had lately occupied, and looked up blandly. "May I inform you, to save time, that I heard the entire proposal that you made to this lady and this gentleman, and I'll also remind you that we sail under ar-

Spendthrift Dominions
There is probably no other country which so lightly regards the rights of the future as our own Australia. To tear something out of the continent and pass it over to others for its present cash value has become the ruling principle. After nearly a century and a half of white settlement, the year 1925 finds us still largely hewers of wood and drawers of water for other peoples—Sydney Bulletin.

Heal It With Zam-Buk

hand, and Cabuagie apprised them as worth the ransom. Levasseur in his anger sprang at Cabuagie, and a blow scattered the pearls in the sand. The men dived for them.

Levasseur, his hand on his sword, his face a white mask of rage, confronted Captain Blood.

"You do not take her while I live!" he cried.

"Then I'll take her when you're dead," said Captain Blood, and his own blade flashed in the sunlight.

It was soon over. When, with both lungs transfixed, he lay prone on the white sand, coughing out his raspy life, Captain Blood looked calmly at Cabuagie across the body.

"I think that cures the articles between us," he said.

With soulless, cynical eyes Cabuagie and his mates considered the twitching body of their recent leader. Captain Blood had bought them to find Levasseur guilty of the one offense they deemed unpardonable, the crime of appropriating to himself something which might be converted into gold and shared amongst them all. Whilst still they hesitated Blood added something to quicken their decision.

"If you will come to our anchorage, you shall receive at once your share of the booty of the Santiago, that you may dispose of it as you please."

They crossed the island, the two prisoners accompanying them, and later that day, the division made, that which would have parted company but that Cabuagie, at the instances of the men who had elected him Levasseur's successor, offered Captain Blood anew the services of that French contingent.

"If you will sail with me again," the Captain answered him, "you may do so on the condition that you make your peace with the Dutch, and restore the brig and her cargo."

The condition was accepted, and Captain Blood went off to find his guests, the children of the Governor of Tortuga.

Mademoiselle d'Ogeron and her brother—the latter now relieved of his bonds—sat in the great cabin of the Arabella, whether they had been conducted. He doffed his feathered hat, and came forward to the table.

"Mademoiselle," said he in his vile but fluent French, "I beg you to dismiss your fears. Aboard this ship you shall be treated with all honor. So soon as we are in case to put to sea again, we stop at a house for Tortuga to take you home to your father. And pray do not consider that I have bought you. Count it, if you please, a friendly loan to be repaid entirely at your convenience."

Mademoiselle stared at him in unbelief.

"Oh, you are noble!"

Captain Blood sighed. For the whole truth, which he withheld from Mademoiselle d'Ogeron, was that in venturing his life to save her, he had been driven by the thought that the deed must be pleasing in the eyes of Miss Blimp who she but witness it.

That affair of Mademoiselle d'Ogeron bore as its natural fruit an im-

"You do not take her while I live, he cried."

"Ho, ho!" laughed Levasseur unpleasantly. Then added: "If you dislike my conduct we can dissolve the association."

"That is my intention. But we'll dissolve it when and in the manner that I choose, and that will be as soon as you have satisfied the articles under which we sailed upon this cruise."

"What do you mean?"

"I'll accept the situation as I find it. You'll fix the ransom of this couple at twenty thousand pieces, and, as I father, the lady is to be your perquisite. But why should she be your perquisite more than another's, seeing that she belongs by the articles to all of us, as a prize of war? However, I'll not dispute her to you if you are prepared to buy her."

"Buy her?"

"At the price you have set upon her."

"That is the ransom of the man. It is to be paid for him by the Government of Tortuga."

"No, no. You've set their value at twenty thousand pieces, and for that sum you may have them, since you desire it; but you'll pay for them the twenty thousand pieces that are ultimately to come to you as the ransom of one and the dowry of the other; and that sum shall be divided among our crews."

That Captain Blood should dare oppose him with but a dozen followers whilst he had a hundred at his beck and call never entered the ruffian's mind. But he did not reckon on the cupidity of his own men. They saw twenty thousand pieces within their reach. Levasseur demanded time until he had captured sufficient booty. But Blood would have none of that. Death lurked always in this desperate business, and he added:

"Then let some one buy the prisoners who do."

"And who do you suppose has it if I have not?"

"I have!" said Captain Blood.

"You have!" Levasseur's mouth fell open. "You... you want the girl?"

Captain Blood drew forth a small bag. Twenty beads poured into his

Lord Julian Wade aboard the Royal Mary.

"Mademoiselle," said he in his vile but fluent French, "I beg you to dismiss your fears. Aboard this ship you shall be treated with all honor. So soon as we are in case to put to sea again, we stop at a house for Tortuga to take you home to your father. And pray do not consider that I have bought you. Count it, if you please, a friendly loan to be repaid entirely at your convenience."

Mademoiselle stared at him in unbelief.

"Oh, you are noble!"

Captain Blood sighed. For the whole truth, which he withheld from Mademoiselle d'Ogeron, was that in venturing his life to save her, he had been driven by the thought that the deed must be pleasing in the eyes of Miss Blimp who she but witness it.

That affair of Mademoiselle d'Ogeron bore as its natural fruit an im-

provement in the already cordial relations between Captain Blood and the Governor of Tortuga. It was not difficult then for Captain Blood to recruit able crews, and he might have increased the number of his ships as well, but he decided to hold to the three vessels which were his—the Arabella, the La Poudre and the Santiago, which he had rechristened the Elizabeth.

It was with this fleet that he carried out the enterprise against Maracaybo, an enterprise in which Peter Blood's share was only surpassed by stupidity which almost turned the tide against him and delivered him and his men over to the tender mercies of his implacable enemy, Don Miguel de Espinosa y Valdez, the Admiral of Spain.

Captain Blood had landed at Maracaybo and had found the town empty. Too soon he learned of the trap. Espinosa had put into the narrow neck of the bay with his ships and had bottled the buccannier in the bay.

A ship, captured by Captain Blood, was loaded with combustibles and powder and was sailed directly at the Spaniards under the galleons held the two like a vice. Then it was set aflame. The Admiral's flagship burst into flame, and five seamanship and hard fighting with his three ships made Captain Blood master of Maracaybo Bay. But when the Spaniards turned tail for shore and he gave chase, the fort which guarded the bay and which had scored derelict, poured down a raking fire upon him and drove him in mortification and despair to take refuge in the town. The Spaniards secured themselves in the fort.

With a devil's luck and clear headed thinking, Captain Blood feinted with preparations for a land attack after he had managed to acquire a large ransom in gold from the Governor of Maracaybo, and, opening a broadside, put the fort in flames. Captain Blood sailed for Tortuga. Don Miguel was left to chew the bitter end of lost opportunity.

(To be continued)

Discount Was Worth While

Mark Twain Gave Book and Seventy-Five Cents.

In American book-selling circles it is customary to allow a discount to publishers, authors, and personal friends. When Mark Twain once visited a bookshop he chose a book and said to the assistant:

"Now, as a publisher, I am entitled to a discount of 50 per cent. As an author I am also entitled to 50 per cent, and as a friend of the proprietor I should get 25 per cent. Now what's the price of the book and what do I have to pay for it?"

The assistant did some rapid figuring and handing over the book, said: "I guess we owe you 75 cents. Here you are. I hope we may have your further patronage!"—Jugend, Munich.

There is no pleasure in loafing unless you have something to do.

FOR Rheumatism

ASPIRIN

Proved safe by millions and prescribed by physicians for

- Rheumatism
- Colds
- Headache
- Pain
- Neuralgia
- Toothache
- Lumbago
- Neuritis

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 15 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monoclonal-acetic acid of Bayer AG, Germany. While it is well known that Aspirin means Bayer manufacturing, to assist the public against imitation, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

TIRED OUT ALL THE TIME Nerves Gave Little Rest

Relieved by Lydia E. Pinkham's Vegetable Compound

Harrowsmith, Ontario.—"I took your medicine before my baby was born and since then I was a great help to me as I was very poorly until I started to take it. I just felt as though I was tired out all the time and would take weak, fainting spells. My nerves would bother me until I could get little rest, day or night. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman who is doing what I can to publish the good medicine. I find that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will serve to help others."—Miss HARVEY MULLIGAN, R. R. No. 5, Harrowsmith, Ontario.

In a recent canvass of purchasers of Lydia E. Pinkham's Vegetable Compound over 100,000 replies were received and 98 out of every 100 said they had been helped by its use. This medicine is for sale by all druggists.

NAVAL PROGRAM FOR CANADA TO DEFEND COASTS

Ottawa.—A resolution proposing that "Canada should consider the question of defence of our sea coasts and of our ocean-borne lines of commerce," was introduced in the House of Commons by A. W. Neill, Independent, Comox-Alberni.

Mr. Neill introduced the subject by suggesting that the question be taken up in a non-partisan spirit. He suggested that a small committee of the house might be formed to consider the matter, with the aid of technical experts. "A policy might be evolved of defence under the name of the 'Canadian policy'."

Mr. Neill urged the necessity for defence of coast lines and shipping. The dry dock at Esquimalt, which was to be finished shortly, would be of vital importance to any British naval operation in the Pacific. Today, there was particularly open to the world, with only a few obsolete guns to protect it. Mr. Neill quoted General McEwen as stating that the next war would be in the Pacific.

The value of public works in Vancouver and Victoria was estimated at \$200,000,000, and a coast line of 10,000 miles was "absolutely" defenceless. Most important of all was the defence of shipping. The greatest damage could be done there, and the object of any enemy would be a blockade and destruction of shipping.

Says Danzig Well Armed

Paris. Correspondents Report City Arsenal of Rifles and Machine Guns.

Paris.—"Danzig is like a powder magazine," says the correspondent of Le Journal, who, with the representative of Le Matin, went to that free city to investigate the difficulties between it and Poland. "The day Europe blows up it will be because Danzig exploded," the correspondent continues. "Two thousand artillerymen await, one at Koensberg and the other at Berlin, fuse in hand, ready to act when the time comes."

Le Matin's representative says Danzig, with its German population of a third of a million, can arm 60,000 men at the first call. He adds that the city is a regular arsenal of rifles and machine guns.

Germany Is Disarmed

Retiring U.S. Ambassador to Germany Denies Reports Circulated to Contrary

New York.—Alonso B. Houghton, retiring United States ambassador to Germany, and the new ambassador to Great Britain, who arrived on the Aquitania, emphatically denied to interviewers that munitions were being stored in large quantities in Germany. "Hiding there," he said, "may be found some crazy men, or a few radicals, who may have stored a hundred or more guns, but I can say Germany is disarmed."

Hudson's Bay Company Land

98,059 Acres of Land Granted to Company in Last 10 Years

Ottawa.—During the last 10 years the Hudson's Bay Company has been granted 98,059 acres of land. The land is in the prairie provinces and Northwest Territories. Of the total, 42,830 acres are classed as notifications and allotments of one-twentieth of the remainder, 55,229 acres, are classed under exchange account.

The above information was furnished by the government in reply to a question in the house.

DANDRUFF

Minard's cleanses the scalp, opens the pores, stimulates the roots of the hair to new activity. Rub Minard's into the scalp four times a week.

W. N. U. 1548

Alberta Legislature Endorses Senate Reform

Edmonton.—The legislature endorsed a resolution by W. H. Davidson, independent member for Calgary, urging senate reform, and also supporting the suggestion made in the speech from the throne in the Parliament of Canada, providing that this body be empowered to amend the British America Act. There was no active opposition to the resolution. All speakers agreed that some form of senate reform was necessary. Some even went so far as to advocate abolition of the senate entirely, while others suggested a limitation of powers.

Plan Is Not Favored

Scheme to Settle Retired Professional People in Dominion Is Frowned On

London.—It is doubtful whether the scheme to settle retired professional people possessing funds but comparatively small incomes, in the different dominions on the community principle proposed by Sir Ronald Bournet and others, will be seriously considered. The idea is that retired civil servants and general professional folk, who now take themselves to a modest English or continental resort, would welcome the opportunity of dwelling more or less closely together in the dominions.

It is suggested that 50 to 100 of these families could establish communities, with a clubhouse for meals, etc.

Many critics suggest that it would be pretty "cool" to expect the overseas settlement committee to provide financial assistance for helping those who have made their life's income from the British government to spend their retiring allowances outside the country.

Beet Growers Organize in Southern Alberta

Propose Bringing in Russian-German Families to Work in Fields

Lethbridge, Alta.—One hundred beet growers of Southern Alberta have organized the Southern Alberta Beet Growers' Association. Representatives of all irrigation districts were present at the meeting with T. George Wood, manager of the Utah-Idaho Sugar Company, and means of financing and finding labor to handle 6,000 acres of beets this year were considered. An effort will be made to bring in Russian-German families for work in the beet fields, and a representative of the C.P.R. was present to offer co-operation in this regard. Japanese labor is also being considered. Financing the province of the crop is now being discussed with the Bankers' Association.

Work Will Be Costly

London.—The announcement of the partial closing of St. Paul's Cathedral, enabled the public to realize the magnitude and the cost of work which will require to be accomplished before the edifice is made secure for the years to come. No exact estimate of the expense can yet be made, but the work extending through years will make large demands upon the public for support.

Competing With Foreign Coal

Brussels.—Many Belgian coal mines have been compelled to close for one day weekly because of the competition from foreign coal. They have also discharged their foreign employees. The Belgian coal stocks have reached the unprecedented total of two million tons.

Automobile Thieves in Calgary

Calgary, Alta.—Automobile thieves were responsible for \$21,300 out of the \$21,038 worth of property stolen in this city during February, according to the monthly report of the Calgary detective department. Of 16 cars taken, all but one were recovered during the month.

Professor Of Chinese Dead

Sandwich, Eng.—Sir Alexander Hoise, professor of Chinese at Oxford University, died recently, aged 72 years. He was the British delegate to the Shanghai international opium commission in 1909, and was the author of a number of works on the Far East.

Was Choice of Convention

W. A. AMOS

For third successive year chosen to head Canadian Council of Agriculture. He is also president of the U.F.O.

Alberta Deficit

Will Conserve and Develop Natural Resources in the Interests of the People

Edmonton.—In his annual budget speech in the Alberta Legislature, Hon. R. G. Reid, provincial treasurer, forecasted a deficit of \$268,632.51 on general income account for the year 1925. The deficit last year was \$620,841.42.

Hon. Mr. Reid announced the intention of the government to re-enact, in a different form, the Miner Right tax, which was disallowed by the Dominion Government last year, but no item is included in the estimated revenue for this tax.

"We are confident," said Mr. Reid, "that the natural resources can be more economically administered by the province than by the Dominion authorities. It will be our duty to see that these resources are conserved and developed in the interests of the people."

Features of the budget speech are: Estimated increase in revenue for 1925, \$778,937.46.

Estimated increase in expenditure and controllable expenditures between 1921 and 1924, \$1,171,864.14. No new tax methods forecasted.

Manitoba Drug Addicts

Seventy Known Cases in Province. Reported in House

Winnipeg.—There are 70 known drug addicts in Manitoba, according to a return tabled in the Provincial Legislature by Hon. D. L. McLeod, municipal commissioner.

Estimates ranging from 400 to 800, including Chinese, the return states, are mere conjectures, and comprise a large percentage of persons known in police circles as "floaters."

The report suggests control is not a question of public health. It is a matter of public safety, and the efforts toward suppression of the traffic in narcotic drugs are more likely to produce fruitful results.

France Requires Foreign Loan

Only Way Treasury Can Pay Obligations Promptly

Paris.—A foreign loan of four or five billion of francs to enable the treasury to pay its obligations promptly is France's fundamental need in the present and approaching financial crisis, says Louis Loucheur, in a long interview, published by Le Journal. The paper had appealed to him, at an outstanding expert in finance, to suggest a way out for the country facing the maturity of 23,000,000,000 francs' worth of securities this year.

Appetite Keen and Bowels Relieved

You can relish your meals without fear of upsetting your liver or stomach if you will put your faith in

Coarse Grain Pool For Saskatchewan

Regina.—Decision to operate coarse grain pools when 50 per cent. of the four-year average acreage sown to rye and flax and 23 1-3 per cent. of the four-year average acreage sown to oats and barley have been signed up, was reached at a meeting of the Saskatchewan wheat pool directors. This decision was taken on instructions from the recent delegates' meeting authorizing the board to proceed with the organization of coarse grain pools immediately. The board took the view that it was vitally important that the pools should control the major portion of the marketable surplus of coarse grains.

Did Extensive

Exploration Work

Director of Geological Survey of Canada Dies at Ottawa

Ottawa.—Dr. William McInnes, formerly director of geological survey of Canada and director of the Victoria Museum, Ottawa, died in a local hospital here after a lingering illness, aged 67. He did extensive exploration work in all parts of Canada and several geological reports compiled by him will remain monuments of his efforts. He was a native of Fredericton, N.B., where he was educated at the University of New Brunswick.

Dr. McInnes' first geological work was done in his home province of New Brunswick, and later he spent considerable time in exploration work in Northern Ontario and Manitoba. Extensive explorations were made by him along the Severn and Albany Rivers, while he also spent a long period making geological explorations along the proposed route of the Hudson's Bay Railway.

Explorers Killed In British East Africa

Knocked Down and Trampled by Wounded Rhinoceros

London.—A dispatch to the Daily Mail from Mafjori, in the Kenya Colony of British East Africa, reports that Mrs. Green, a noted Irish explorer, from Dublin, and Captain Atkins, have been killed by a rhinoceros. Mrs. Green was about to climb Mount Kenya when she encountered the rhino at Nanyuki. The woman fell and wounded the animal, which thereupon charged upon and fatally injured her.

Captain Atkins, accompanied by his wife, arrived later on the scene, and the rhinoceros charged upon them. The captain shouted a warning to his wife, and tried to blind the animal by throwing stones at its head, but was knocked down and trampled to death. Mrs. Atkins made her escape and brought back gunned to the scene, who shot and killed the animal.

French To Explore Arctic

Norwegian Will Conduct Expedition to Franz Joseph Land

Oslø, Norway.—Captain Otto Sverdrup, Norwegian explorer, has consented to conduct the French Arctic expedition's ship to Franz Joseph Land. The expedition, under Lieutenant Jules Dozyer, probably will start this summer, and will be gone a year. Airplanes will be used, and it is possible an attempt will be made to reach the Pole, but the main objects of the expedition are scientific.

No Discrimination Shown

Ottawa.—After a comparatively brief discussion, during the course of which Hon. Charles Murphy, postmaster general, assured the House of Commons that no discrimination against the Canadian National Railways in the carriage of mails was being practised, a resolution opposing such discrimination was withdrawn by its mover, W. J. Ward, Progressive, Dauphin.

Large Shipment Of Chinese Cotton

Victoria.—When the liner Empress of Australia arrived recently from Yokohama, her cargo included 1,500 tons of Chinese cotton, the largest single shipment of this character ever sent from China to Canada. She also carried nearly 3,500 bales of raw silk, valued at more than \$1,000,000, for New York. Her passenger list numbered 204.

FRANCE MAKES THREAT TO FORM A JAP ALLIANCE

London.—The French are threatening an alliance with Japan and Russia, in the event of the failure to secure from Britain the strong pact of security which they are demanding. The basis of the proposal is a grant of permission to Japan to use Indo-China ports in the event of war with the United States or Britain.

France's position now is that both the Geneva protocol and Anglo-French pact proposals are dead. The protocol was killed by the opposition of the Dominions, and the pact was undermined largely by the publication of the Chamberlain memorandum. This was published widely in the British and Dominion press and so aroused public opinion that the cabinet was forced to take action definitely opposing the plan. Austen Chamberlain had to tell Premier Herriot while passing through Paris recently that it would be impossible for Great Britain to carry out the plan he had suggested.

This leaves only one plan—that proposed by Germany, but the French are opposed to this, both because they fear it would help re-establish Germany, and because they are tied by promises to Poland.

Northern Telegraph Upkeep

Government Lines If Northern Canada Are Operated At a Loss

Ottawa.—Half a dozen telegraph offices operated by the Dominion Government in Northern Canada cost, for upkeep, in 14 years, \$94,474 more than they earned. This is shown in a return tabled in the house, which gives details of receipts and expenditures for six offices in the Peace River country. Of these only one, Grande Prairie, came near to paying expenses, which were \$27,539 for the 14-year period, while its revenue totalled \$23,859.

Peace River, in the same period, earned \$3,249 and cost in upkeep, \$67,512; Spirit River earned \$11,575 and cost \$34,236; Dunsmuir earned \$3,069 and cost \$6,745; Beaver Lodge earned \$3,281 and spent \$15,284; and Waterhole earned \$1,777 and cost \$5,583.

Alberta Has Endorsed

Game Law Conference

Aim Is To Protect Game On Border Lands

Winnipeg.—Alberta has endorsed the proposed conference of game law officials of Canadian provinces and adjoining states, J. H. Egan, minister of agriculture, announced. Manitoba proposed the meeting, and Minnesota has already endorsed it. Ontario has been asked to support the scheme. It is sought to provide adequate machinery for mutual protection and control of game on international and international border lands and to breakers of law seeking immunity across these borders.

Inventor Of Baby Wire

Death. His.—The inventor of barbed wire is celebrating his 50th birthday. He is Jacob Hish, president of a bank here, which institution he conducts by telephone from his bed, having been invalid for more than a year.

Here and There

An unusual consignment passed
through Montreal recently in the
care of the Dominion Express Com-
pany when six Rocky Mountain sheep
were shipped to Austria to form part
of a zoological exhibit there. The
animals, which are valued at \$600,
came from the National Park at
Banff, Alberta.

Alberta farmers have recently
been shipping a new commodity to
the market. During the past few
years there has been a considerable
increase in the number of bee-keepers
and last year 160 keepers had a
total production of nearly 60,000
pounds of honey, valued at approxi-
mately \$15,000. The exact number
of bees is not known.

Contract for aeroplane spruce has
been made between Vickers Limited,
manufacturers of aeroplanes, and
Frank L. Buckley, of Vancouver, B.C.
The spruce will be logged on the
Queen Charlotte Islands and milled
at the Buckley Mill at Port Clement,
on Graham Island and at Burrard
mill, in Vancouver. The contract
calls for the delivery of two million
feet during 1925.

Canada leads the world in automo-
bile exports in proportion to produc-
tion, domestic sales or ownership of
motor vehicles or to population. Not
relatively but absolutely the automo-
bile exports of the Dominion are only
exceeded by those of the United
States. Since 1920 the motor vehicle
exports of Canada have nearly
doubled, the increase being from 9.8
per cent. to 17 per cent. of the auto-
mobile export trade of the world.

A special train of forty-two cars
containing nearly 900 head of stock
for export to Great Britain, arrived
at the Canadian Pacific Railway's
East End stock yards, Montreal, re-
cently. These, added to shipments
from Packingham, Ont., Toronto and
other points in Ontario and Quebec,
made up what cattlemen claimed to
be the greatest concentration of
Canadian cattle for export in the his-
tory of the trade. From the yards
the cattle were shipped by special
train to the ship's side at St. John,
N.B.

When the round-the-world cruise
passengers aboard the Canadian Pa-
cific steamship "Empress of France,"
reached Egypt recently, they were
entertained by Essam Khattab, a
prominent shiek holding authority
over a large number of villages
along the Nile. Unfortunately, the
shiek succumbed to a sudden attack
of heart failure. The visitors from
across the Atlantic before returning
to their ship were permitted to at-
tend the funeral, which was con-
ducted in the desert with weird and
impressive religious rites, an expe-
rience few world-travellers have
known.

Between 300,000 and 400,000 Cana-
dians and Americans of Norwegian
origin will gather at Minneapolis
and St. Paul in June next to cele-
brate by a great national gathering
the hundredth anniversary of the
landing of the first organized party
of Norwegian settlers on this con-
tinent. President Coolidge, King
Haakon of Norway and Lord Byng,
Governor-General of Canada, have
been invited to attend. Meetings
of some forty Norwegian organiza-
tions, divine service by the Bishop of
Oslo (formerly Christiania), field
sports, musical contests and historic
pageants will make up the pro-
gramme.

CANADA'S NEW LINK WITH ALASKA

It is not many years since Alaska
was one of those countries
whose geographical location was
indicated with a grandiloquent
ruecy of the arm northwards. It
has always been a land of mystery,
romance and adventure. It has
provided the theme for the thrill-
ing tales of novelists and the stir-
ring poems of northern bards. But
even though the days of the cheba-
ko and the soursough is done, the
brief but active span of the Dan-
cous Dan Magvoren and the Lady
Lou's, matters of historical refer-
ence, the lure of Alaska has not
waned, but is as appealing as ever
to the hearts of men and women
wherein a bit of romance lurks,
and that means to everyone.

Alaska is no longer a far off
country. It is a very near neigh-
bor to Canada. It will be even
nearer this summer. Mr. J. E.
Dalrymple, Traffic's Vice-President
of the Canadian National Rail-
ways, has announced that com-
mencing on June 22nd, the com-
pany will inaugurate a weekly
steamship service between Prince
Rupert and Alaska, and the old-
burning steamships, "Prince
George" and "Prince Rupert,"
which have already established a
reputation as being among the
best-appointed vessels on the Pa-
cific Coast, will be engaged in this
new service.

Going northward the ships will
reach Prince Rupert at 10:30 on
Wednesday morning, following the
Monday of sailing from Vancouver
and tourists will be given an op-
portunity to see something of this
new Pacific port, as the steamer

Some of the scenes along this
magnificent sea voyage are
shown in the photographs:
(1) A view of Skagway,
Alaska, where visitors will be
given ample time to see this
famous town and also to visit
White Horse and the Alton Lake
District.
(2) A beautiful sunset scene
on the Lynn Canal, which the
steamships Prince Rupert and
Prince George will thread on
their journey into the Land of
the Midnight Sun.
(3) The Taku Glacier, one
mile wide and ninety miles long
—one of the largest and most
beautiful glaciers in the world.
(4) The Prince Rupert,
which, with the Prince George,
will be used in the Vancouver-
Prince Rupert-Alaska service
this summer. These boats are
oil-burners and are among the
finest appointed vessels in the
Pacific Coast service.

Inset is one of the curious
totem poles to be found in the
business section of Wrangell,
Alaska.

does not continue on its northern
trip until four o'clock that after-
noon. After passing Old and New
Mistakla and Fort Simpson, an old
Hudson's Bay Post, calls will be
made at Ketchikan, a typical Alas-
ka town built at the foot of the
mountain. Proceeding from that
point the steamship will touch at
Wrangell, beautifully situated near
the mouth of the Stikine River and

possessing many associations with
the period when Alaska was a
Russian possession. The next
point touched will be Juneau, the
capital of Alaska, and a modern
city with good motor roads and
many points of interest, including
the Mendenhall Glacier and mines
which have made this country fam-
ous. On the way from Wrangell to
Juneau there will be an opportu-
nity to see the grandeur of Taku
Inlet and the famous Taku Glacier,
over a mile wide and 90 miles long.

The ships will arrive at Skagway
at seven o'clock Friday morning
and will remain there until seven
o'clock Saturday night, thus giving
ample opportunity to passengers
to see this famous town and to
visit White Horse and the Alton
Lake District. On the south-bound
journey the steamers will reach
Vancouver at nine o'clock Wednes-
day morning, making a complete
ten-day round trip.

In addition to the Alaskan trip,
the tri-weekly service between
Vancouver and Prince Rupert will
be maintained and also a semi-
weekly service to Anxox and Ste-
wari on the Portland Canal, which
service has been in effect for some
time past. The establishment by
the Canadian National Railways
of this Alaska steamboat service
will meet the demands of many
tourists, and will be a direct al-
max to the famous Triangle Four,
comprising Jasper National Park,
the Rockies, the Coast Range and
the water voyage through the
"Norway of America."

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

WRIGLEY'S

WORLD HAPPENINGS BRIEFLY TOLD

WORLD HAPPENINGS BRIEFLY TOLD

Four men, who entered the national home for lepers at Carville, La., several years ago, have been discharged from the institution as cured.

Dr. Herup Zahla, in concluding the sessions of the international optum conference at Geneva, over which he presided, declared that some solid progress had been made.

Dr. William McInnes, former director of the geological survey of Canada, and director of the Victoria Museum, Ottawa, is dead, after a lingering illness. He was 67.

The board of railway commissioners for Canada held 55 public sittings in 1924, at which 225 cases were heard; the board's annual statement tabled in the House at Ottawa shows.

The sum of \$199,352 was advanced under the Empire Settlement Act last year for assisted passages. Hon. J. A. Robb, minister of immigration, informed D. F. Kellner in the House of Commons.

Jan Christian Smuts, former premier of the Union of South Africa, is vigorously opposing the bill by which the Heriotage Government would let quality blacks and Asiatics from the enjoyment of their full rights.

Officials of the Imperial Bank of Canada warn the public that a considerable number of counterfeit notes of its old British American Bank Note Company issue dated January 1, 1917, for \$100 each, are appearing in circulation.

The Belgian Government has issued orders to prevent the admission into that country of the Irish Republican leader, Eamon de Valera, who had been invited by Flemish agitators to give a series of lectures there on Ireland and the Flemish martyrs.

Mrs. Annie E. Perry

—Levy studio

Windsor, Ont.—"In my young motherhood Dr. Pierce's Favorite Prescription was such a great comfort to me as a tonic and nerve tonic. I would urge every expectant mother to take it. It kept me well and strong and able to attend to my household duties right up to the last. My children are healthy and I have not forgotten the great benefit I derived from the 'Favorite Prescription' and that is why I am recommending it to the young mother of today."—Mrs. Annie E. Perry, 211 Bridge St.

Sold by dealers, in both fluid and tablet form, or send 10c. for trial 30c. tablets to Dr. Pierce's Laboratory in Bridgeburg, Ontario.

Over Sixty Ways To Serve Cheese

Beautiful Recipe Book May Be Obtained Free of Cost

That Canada will soon take its place with the nations that are the largest consumers of cheese seems assured considering the steady increase in its consumption in the past few years since the Kraft-MacLaren Cheese Company, of Montreal, introduced the five-pound box. The Kraft Company were the originators of the popular luncheon-wrapped cheese, without rind or waste, in the five-pound wooden box, and while the original product has had many imitations, none have been able to produce a cheese of the same uniform quality and flavor because the Kraft process is protected by patents. The company does not make cheese, therefore, it is not competing with the cheese factories. But it purchases Canadian cheese in enormous quantities, thus keeping the cheese factories busy and adding to their prosperity and that of the farmers. Kraft Cheese is simply a scientific blending of these manufactured cheeses by means of the patented Kraft process which absolutely controls the flavor.

This company has just issued a beautiful recipe book showing over 60 different ways in which cheese may be served. Many of the dishes are illustrated in natural colors. A copy may be obtained, free, on writing to the company, in Montreal, mentioning this paper.

Real Gold Diggers
Real "gold diggers" are working along a beach at Brooklyn. They dig up the sand, sift it through a sieve and often find gold rings and other valuable trinkets. Several of them are making a good living.

WALKED THE FLOOR FOR HOURS NERVES WERE SO BAD

Wherever there are people who are troubled with deranged nerves they will find in Milburn's Heart and Nerve Pills, a remedy that will restore the equilibrium of these deranged centres and bring back the shattered nervous system to a perfect condition.

Mrs. W. W. Authouse, Woodroffe, Ont., writes: "After having a severe attack of bronchitis I was left in a very weak, run-down condition; my nerves were all broken up; could not sleep at night, and would have to get out of bed and walk the floor for hours."

MILBURN'S HEART AND NERVE PILLS

I began to feel much better, and after taking a few more boxes I could once enjoy my rest as well as I ever did. I now recommend them to all my friends."

For sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Flame Burns Under Water

Produces Steam Power Capable of Driving Locomotive or Steamship

By a process evolved by Mr. Oscar Bruner, a young English engineer, a submerged flame, burning in direct contact with water, can produce instantly steam power capable of driving a locomotive or a steamship. The method is applicable also to chemical solutions, for purposes of concentration. With a generator measuring three feet by four feet six inches, Mr. Bruner claims he could generate power sufficient to drive a locomotive from London to Glasgow and back. Its application to shipping would enable a liner to leave harbor immediately, it is claimed. The flame is produced by a mixture of oil and air, which is ignited after contact with the water, where it burns fiercely, attaining a temperature of four thousand degrees Fahrenheit. In addition to its mechanical applications, the principle can be applied to the interests of agriculture in the production of nitric acid and calcium nitrate, by regulating the amount of air burned in the flame.

Priest Burned At Stake

Father Andrzej Fedukowitch, a Polish Catholic priest, has been burned to death in the town of Jitomir, near Kiev, Ukraine. The authorities allege that his assassins were agents of the Polish secret police.

Corns are painful growths. Holloway's Corn Remover will remove them.

No woman should think of marrying until she acquires a forgiving disposition.

Transcontinental Connection

Alberta Residents Will Be Able to Communicate by Phone With New York

It will not be long before Alberta people will be able to hold telephone communication with New York, San Francisco, and other points in the United States. Within the next three months, connection will be established between the Alberta Government telephone system and the Transcontinental telephone system in the States, by means of three long distance lines which are to be brought to the southern border of the province by way of the mountain states telephone system in Montana. This will provide almost continuous long distance telephone connection for Alberta.

"DIAMOND DYES" COLOR THINGS NEW

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil for rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, awnings, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Adapts Rotor To Airplane

Austrian Engineer Applies Fletcher Principle to Air Travel

Successful adaptation of the rotor to the airplane, is claimed to have been accomplished by an Austrian engineer, Herr Gligorin. The inventor is a graduate of Vienna University, and for several years has been connected with various Austrian and Hungarian airplane firms, and is a qualified pilot.

"My invention," he says, "is a combined propeller and rotor-driver plane, and for several years has been connected with various Austrian and Hungarian airplane firms, and is a qualified pilot."

Herr Gligorin says he believes he can make the flight to New York from Europe in less than twelve hours. He claims that his model, when tested at Vienna showed that it could travel at more than three hundred miles an hour with only a 120-hp. motor, and reach a height of three thousand feet within two minutes.

The Oil of the People—Many oils have come and gone. But Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front, and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

First General Assembly

The first general assembly of the United Church of Canada will be held in Toronto on June 11, and an invitation to hold this meeting in Trinity Methodist Church has been extended. This is the largest Methodist Church in Toronto, with a seating capacity of approximately 1,600.

Clear Your Complexion With Cuticura

SUNDAY SCHOOL LESSON

MARCH 22

THE FORTY DAYS AND THE ASCENSION

Golden Text: Ye are witnesses of these things. Luke 24:48.
Lesson: Luke 24:13-35.
Devotional Reading: Psalm 24.

The Text Explained and Illustrated
Christ Appears on Easter Evening to the Eleven, verses 36-43. Luke follows his account of the resurrection of Christ (the empty tomb seen by the three women and by Peter) with an account of Christ's appearance that afternoon to the two disciples on their way to Emmaus, and then gives an account of his appearance that evening to the eleven apostles. While the two to whom Christ had made Himself known at Emmaus in the breaking of bread were telling the apostles in Jerusalem of their wonderful talk with the Risen Lord, He Himself suddenly appeared in their midst and said, "Peace be unto you," the customary form of greeting. Notwithstanding what they had just heard, they were greatly terrified, for they supposed that they beheld a spirit, that is, "a form recognizable as that of Jesus; but of Jesus not risen but come from the world of the dead disembodied or only with an apparent body."

"Why are ye troubled? and wherefore question ye in your hearts?" Jesus asked; and then to reassure them, "I convince them that he was a living Man and not a disembodied spirit, he bade them touch and touch His hands and his feet: 'A spirit hath not flesh and bone, as ye behold Me having.' He laid them."

Poland Paying National Debt

Only European Country Following in Great Britain's Steps

Poland is paying her national debt, and is the only European country which has so far followed in Great Britain's steps. Ratification of the agreement for the funding of the debt to the United States has been unanimously voted by the Chamber of Deputies. The agreement provides that Poland shall pay this year a sum of more than a million dollars and that the payment of the debt would be spread over a period of years until 1984.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest, and if not attended to, endanger life. The child can be spared much suffering and the mother's much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Audience Goes in Costume

If you want to go to a new amateur playhouse at Hastings, Eng., you must dress like the actors do on the stage. "The Knight of the Burning Pestle," a play of the King James I. period, was recently presented and the entire audience appeared in ancient costumes.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Manitoba Redistribution

A redistribution measure, which would reduce the number of seats in the Manitoba Legislature to 45, is under consideration by supporters of the Bracken Government. It is stated. At present the legislature is composed of 55 members. Plans for registration of voters have been put forward, and a policy already has been adopted by the Bracken Government in preparation. It is reported, for the next appeal to the country.

For Sore Throat Use Minard's Liniment

British Pensions
Pensions amounting to 72,000,000 pounds (about \$250,000,000), were paid to war veterans and dependents of those killed in the World War by the British Government in 1924.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—one day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colic and gripes and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 5c. per box from The Dr. Williams' Medicine Co., Brockville, Ont.

Many Einstein Books

Prof. Morris Leoc of the University of Louvain, has recently been at work on a bibliography of books about Einstein and relativity. He has found the number to be 3,775, only 125 of which have been published in Germany. England has contributed 4,500, France 680, Italy 215, and Holland 126.

SPOHN'S DISTEMPER COMPOUND

Don't take chances on your house or office being laid up with distemper, wallpaper, and paint. Give "SPOHN'S" to both the sick and the well. It is the best and most economical for 25 years, gives "SPOHN'S" for the distemper, and is the best for the house.

Stony Plain and District.

On Tuesday March 2d. to the wife of Mr. John Schultz a daughter.

Mr and Mrs Reuben Larson arrived in Stony yesterday after a two-months visit to their former homes in Minnesota.

At the local court on Saturday last a young man from a nearby village was fined \$20 and costs for being in an intoxicated condition in a public place, and the same chap was fined \$10 and costs for committing an unprovoked assault on a young man. This happened at the close of the picture show performance in Stony on March 7th.

Owing to an accident, Mr Carl Propp was forced to leave his sleigh one evening last week in the schoolyard of Warden school. During the night somebody made off with 3 sets of doubletrees, a neck-yoke and several other articles.

About a score of Holbornites took a sleigh ride over to the pie social at Telfordville Friday night, and had a very enjoyable time. Miss Bessie Woodley's pie took the prize. It selling for \$5.

Watch for the red stamp on your paper. Subscription has expired.

Applications for auto licenses may be had at The Sun Office.

Keep in mind the box social and dance at Holborn Hall on Monday April 13.

News from the Grove.

Mr Phil Schmidt made a trip to Stony on Monday, renewing old friendships.

Mr Jacob Brox announces the sale of his hog-laying business to Mr P R Logan, who has been his competitor for the past year. Mr Brox wishes to thank the farmers who have patronised him during the eleven years he has been in this business at the Grove.

The dance given on the 18th in Schmidt's hall by the Martin orchestra was the best of the season and drew quite a large crowd.

Mr and Mrs Shaw, who have been making a lengthy visit with their daughter, Mrs G Ferguson Smith, and Mr Smith, are planning to leave shortly for their home at Sydney, New South Wales.

The favorite indoor sport now is phoning in to the Edmonton Journal when it is broadcasting a concert, saying you like it, and have the operator reply: "Allo! Macasperson, at Spruce Grove! Glad to know the concert is coming thru all Ho-ki!"

Sporting Notes.

Concordia College demonstrated again their superiority as hockeyists when they triumphed over Stony's team on Saturday last, on the Arena ice. The local bunch did not lack for quantity or quality, as it had ten players on the job, including the best puck-chasers hereabouts, with two others in reserve.

The score was 3 for the College boys and 2 for Stony. The latter claim they made 5 goals all told, but the referee disallowed three of these for offside play. Regret was expressed at the inability of young Bill Smith, Stony's good little goal-keeper, to be present.

Stony's two goals were shot by Heichen and Alf; that other good player, Herman Loeblich put in two of the other goals which were not allowed by Referee Hedrick.

Those who scored for the College were: Enders 1, Ross 2.

The local skating rink was closed by order of one of the officials all the week previous to the game, eliminating all possibility of the local players having practice.

Following are the teams—

Concordia	Stony Plain
Birkhart	goal
Treit	defence
Oldhaver	J Umer
Rosen	centre
Wenschler	1 wing
Enders	2 wing
Ries	Sula
Schmidt	P Lawton
Felix	Phil Alf
	J R Miller

Saturday night seen a curling match on the local rink between the Married v Single members. The Benedicts won 13 to 12. Winners: Dr Oatway (skip), James Smith, It B Brooks, F W Lundy, Opponents, L Zilliox, Anderson, Gillzie, Walter skip.

There is talk of Stony's hockey players going to the City, to again face the music with the College boys.

NOTICE TO CREDITORS

IN THE DISTRICT COURT OF THE DISTRICT OF EDMONTON.

IN THE MATTER OF THE ESTATE OF MARTIN KOTSCHEROFSKY, DECEASED.

NOTICE IS HEREBY GIVEN that all creditors of and all persons having claims against the estate of Martin Kotscherofsky, late of the District of Stony Plain, in the Province of Alberta, farmer, deceased, who died on or about the 28th day of October, 1924, are hereby required to send by registered post prepaid or deliver to F. W. Lundy, Executor, Stony Plain, Alberta, the solicitor for the Executors of the said estate on or before the 10th day of April, 1925, their names and addresses with full particulars in writing of their claims and statements of their accounts and the nature of their security (if any) held by them duly verified by statutory declaration.

AND FURTHER TAKE NOTICE that after the said 10th day of April, 1925, the Executors will proceed to distribute the assets of the said deceased amongst the parties entitled thereto, having regard only to the claims of which they shall then have notice, and they will not be liable for the said assets or any part thereof so distributed to any person or persons of whose claim notice shall not have been duly received by them at the time of said distribution.

DATED at Stony Plain, Alta., this 10th day of March, 1925.
F. W. LUNDY
Stony Plain, Alberta.
Solicitor for the Executors Julia Kotscherofsky and Peter Kulak

Calendar.

29—District Court sits in Stony Plain.

Anxious About Feed.

One of the surest signs of the long feeding period are inquiries that are now being made by some of the farmers and ranchers, who are beginning to feel a little uneasiness regarding their spring supply. Though the recent weather has not been very severe it has been playing havoc with the feed stocks and uncertain April is yet to come and judging by the months that have preceded it, there is nothing very much to cheer about, though everybody hopes that the long hard winter means an early spring—and we surely need it.—Market Examiner.

Tea at a Dollar a Pound

The tremendous increase in the popularity of tea as a beverage has been such that the producing countries have been unable to satisfy the demand. The price of tea has been steadily increasing for a number of years. Since, however, you can make from 250 to 300 cups of tea to the pound, even at the price of \$1, the cost per cup is only one-third of a cent.
